

Up-Cycle Your Jewellery

Friday, April 29, 2011

4 - 6pm

Mo'Magic, 1294 Fillmore St.
San Francisco, CA

The Experience

In this workshop, learn basic jewelry techniques, tool handling, stringing, wire-wrapping, forging, and composition. Students are encouraged to bring old jewelry, found objects, or thrift-store finds to up-cycle into a new ring, necklace or pendant. We will start with the basics, work with wire to form a simple ring, and then evolve into personal creations.

About the Instructor

Josie Adele has been an entrepreneur jewelry designer since 2004 and uses recycled elements and local production in her work. She has a degree from Colorado State University and completed the Sustainable Design Program at the University of California Berkeley Extension. She develops eco-efficient products from recycled metals and other materials and views it as a beautiful and rewarding challenge to up-cycle waste into something of value, which will be appreciated for years to come.
